

SSVV 2019-2020

Take Home Exam Subject

300 XP – Study - Impact of Software Testing knowledge on performance in programming

- 3 requirements to be implemented
 - (no test cases, test cases by students, test cases by teacher provided) = 200 XP
- Work in pairs (up to 2 students)

Use the Java source code provided in the project:

2020-SSVV-TakeHomeExam-TestingImpactStudyA.zip

1. Task A_1 = 25 XP
 - a. Implement method
`public int` howGivenManyEmotionTypeInListEmotions(EmotionType et)
 2. Task A_2 = 100 XP
 - a. Implement method
`public List<Emotion>` predominantEmotion()
 - b. Implement your test cases to help you test correctness of your implementation.
 3. Task A_3=75 XP
 - a. Implement method
 - i. `public void` eliminateAllProvidedEmotion(EmotionType et)
 - b. Use the already created test cases to help you test correctness of your implementation.
- Documentation of the “Process” = 50 XP
 - Minutes required for each task
 - Task A_1 =
 - Task A_2=
 - Task A_3=
 - Task A_1 - Describe how did you solve the assignment. Did you use “manual” testing during implementation? If yes, with what data have you test it? How many executions before you declared “satisfied” with the implementation?
 - Task A_2 - Describe how you design your test cases, what techniques have you used, what strategies.
 - Task A_3 - Describe how did you use the provided test cases to “check” for your algorithm correctness? How many modifications did you had to make before all test cases to be “pass”?
 - Survey – on line = 50 XP
 - The link will be provided one day before the exam.

Turn in:

- **Before the day of the final exam, no later than 20:00.**
- **On canvas, under Assignment_TakeHomeExam_StudyTestingOnProgramming submit as an archive**
 - **Source code of your implementation.**
 - **Documentation of the Process**
- **Online survey**
